

Brokers process more business, with less resource, faster, with Websure

Websure is the perfect system to automate the entire broking life-cycle, so you can service clients and carriers quickly and professionally.

Our enterprise-level policy administration and claims management system, is configured to match your needs and includes in-built accounting and full-suite reporting and analytics. Security and flexibility are incorporated into the design.

If you are a direct London-market or wholesale broker, we can automate your open market or delegated processes, so you can focus on generating new business and improving client service. Whether you want to cater to Online savvy clients with transactional websites, automate multi-subscriber placing, settle accounts with carriers using messaging, or get the MI you need with real-time dashboards – Websure is the all-encompassing solution.

With Websure, you can process business quickly by reducing administration time and having the control to distribute and sell on your time-frame.
