## Helping captives flourish

### Award-winning underwriting and data management platform for captives

Flexible technology from Websure enables smoother workflow, delivers substantial processing efficiencies and can reduce the overhead costs of administering captive business.

Suitable for Captive Managers, Risk Management Companies or simple Captives, Websure is the single integrated solution for all your insurance administration needs.

Time consuming creation of accurate management information, using spreadsheets or separate systems, often involving complex processes and open to human errors and inaccuracies - Websure can replace these with a unified solution, seamlessly linking data from all areas of your business.

Policies, claims, financials and reinsurance are tightly integrated in Websure, allowing for seamless administration of your full business life cycle. Data can also be validated on entry.

Multiple business entities are fully supported, including across domiciles, with data separation where required. Outwards/ Ceded Reinsurance can be recorded and financial accounting records created.

Comprehensive insurance accounting functions allow accurate financials across both Insurance and Reinsurance and in turn, more accurate solvency modelling. Data will accurately feed into a general ledger system, with customised mapping to GL account codes.
