Enterprise Solutions for leading Insurers

Ranging from full life-cycle policy administration, Online distribution and electronic messaging, through to top level, advanced data warehousing and real-time reporting dashboards – Websure delivers.

Advanced interaction through API and web services enrich your options to embrace the ever-growing Market and Insurtech advances, whilst having a trusted core centralised system behind it all.

Through consultancy, we can decrease your supplier dependency and you can select the features and modules you need for a customised systems network, unique to your business.

Websure allows multiple companies, divisions or departments to exist side by side, bringing core standardisation whilst allowing flexibility for bespoke channels, markets and Insurance models. Parent, sister and subsidiary companies each benefit from perfectly tailored platforms within one system, providing hierarchical user permissions to allow for automated operational control.
